

Orthopedic Care

Diagnosis—Treatment—Prevention—Rehabilitation

For afflictions of the **BONES, JOINTS, LIGAMENTS, MUSCLES, NERVES** and **TENDONS**

Orthopedic surgeons are devoted to the prevention, diagnosis, and treatment of disorders of the bones, joints, ligaments, tendons and muscles. The value of orthopedic care is when people like **YOU** can get back to work, to your family, and to doing the things you love.

Tendon repair, ulnar/median nerve neurolysis

Joint injections

Fractures of lower and upper limb (conservative treatment, mini-invasive techniques, and open surgery)

Joint replacement (knee, hip, and shoulder)

Foot surgeries (deformities correction, metatarsalgia, plantar fasciitis, etc.)

Hand surgeries (carpal tunnel, de Quervain syndrome, trigger finger, etc.)

Arthroscopic surgery of knee (ACL reconstruction, rotator cuff repair, cartilage and meniscus surgery, shoulder instability, etc.)

Joint preserving surgery

INTRODUCING NEW Orthopedic & Trauma Specialist

Dr. Florin Moise

Dr. Florin Moise joined Family Medical Practice following his posts as orthopedic surgery consultant to the Brasov Military Hospital

and the private Medlife practice in his native Romania. He specializes in lower limb arthroscopy, sports trauma, hip and knee reconstruction, joint preservation surgery and upper limb surgery. An avid proponent of joint preservation surgery, he is a member of the American Academy of Orthopedic Surgeons, the European Society of Sports Knee Arthroscopy, and the Association of Trauma.
